1. Provide all calculations, workpapers, and other documentation which supports the combustion turbine construction figures shown on Attachment 1 of Gary T. Crawford's supplemental testimony.

2. Provide the calculations and workpapers which show how the amounts presented on Attachment 1 as the "purchase alternative" were determined. Include a discussion of how the mix of purchased power bids was decided.

3. Provide all calculations, workpapers, other documents, and assumptions used to arrive at the amounts shown on Attachment 2 of the Crawford supplemental testimony.

4. Provide a detailed explanation of any analysis performed by or for East Kentucky which examined the possibility of making power purchases beyond 1995 and further deferring the construction of the combustion turbines. Include copies of any analysis prepared. If no such analysis was performed, explain in detail why East Kentucky has not looked at this option.

5. Explain the meaning of non-firm transmission service and firm transportation service option shown in footnotes 1 and 2, respectively, on Attachment 3, pages 1 and 2, of Crawford's supplemental testimony. Do the energy charges shown on those pages include transportation wheeling charges? Explain.
